

STORM Parallel Beam 70

Data Sheet

Main Features

- 70cm parallel beam modifier with Aputure Mount optimized for the STORM XT52
- Compatible with Electro Storm XT26, Electro Storm CS15
- Extremely tight **5° beam angle** allows users to throw intense beam of hard light at great distances
- Optional rolling hard **flight case**

What's in the Box

Name	Qty
Parallel Beam 70	1
Plexiglass Protective Cover	1
[OPTIONAL] Flight Case	1

Product Description

The STORM Parallel Beam 70 is a precision-engineered 70cm parallel beam modifier. Designed specifically for the STORM XT52, and fully compatible with the Electro Storm XT26 and CS15, the Parallel Beam 70 with its incredibly tight 5° beam angle delivers an intense and focused beam of hard light capable of being thrown cleanly across long distances. The beam reaches maximum output efficiency at 10m and beyond. With its native Aputure Mount, the Parallel Beam 70 seamlessly integrates with the Aputure Mount ecosystem, unlocking new creative possibilities for cinematic lighting control, especially when maximum light concentration is critical.

An optional rolling hard flight case is available for productions and users that require durability and transportability.

Specifications

Housing Construction Material		Aluminum Alloy
Dimensions	Parallel Beam 70	77.0 x 74.7 x 50.4cm 30.3 x 29.4 x 19.8in
	Flight Case	89.0 x 88.5 x 72.5cm 35.0 x 34.8 x 28.5in
Weight	Parallel Beam 70	10.70kg / 23.59lbs
	Flight Case	39.00kg / 86.00lbs
